

Excel[®]

Alkaline Non-Cyanide Zinc The "Total Package" Process

Every Benefit You Could Want In One Process

Columbia's Excel[®] Non-Cyanide Zinc combines every possible plating benefit into one "Total Package" process:

- ✓ Extremely bright deposits that are comparable to acid zinc plating.
- ✓ Excellent deposit ductility, eliminating blisters even at 1 mil thickness.
- ✓ Superior plate distribution on the most tough-to-plate part configurations.
- ✓ Economical and easy to use.
- ✓ Widest possible current density bright range for rack and barrel plating.

Add these benefits to Columbia's extensive technical support, and you get a total package that is unmatched in the industry.

Let us show you what the Excel "Total Package" process can do for your plating operation. You have nothing to lose and everything to gain.

We are the Zinc Plating Experts.
