

TRIVECTA UNIBLACK

**Bet on the First
One-Part Trivalent
Chromate to Get
More Bang for
Your Buck.**

Zinc platers have been asking for a sure winner—and here she is. TriVecta UniBlack 200, the first, true one-component chromate.

No more babysitting your solution. No more instant zinc build-up to kill the chromate. No more breaking the budget.

Put your money on TriVecta UniBlack 200 and you'll get:

- *Money in the bank*
- *Consistent jet-black, glossy finish*
- *Scratch-resistant deposit*
- *144+ hours of neutral salt spray*
- *20,000 ppm tolerance to zinc build-up*
- *Free of precipitation and sludge*
- *Flexibility in alkaline or acid chloride plating baths*
- *Stability, even after month-long shut-downs*

Be in the winner's circle. Columbia Chemical TriVecta UniBlack 200 is the winner's choice.
