

# TRIVECTA<sup>®</sup> BLACK 100

## GOES THE DISTANCE

### Black Trivalent Chromate for Zinc Plated Parts

- 1 Jet-black and glossy
- 2 Thoroughly field-tested
- 3 Thick, uniform finish
- 4 Highly resistant to corrosion and scratches
- 5 Tolerates more than 10,000 ppm zinc build-up
- 6 Free of precipitation and sludge
- 7 Stable, even after month-long shut-downs

TriVecta<sup>®</sup> Black 100 is out of the gate and leading the pack!

After more than two years of development and field-testing, this thoroughbred trivalent conversion coating for zinc is destined to be a winner.

Place your winning bet on the pick of the experts. Columbia Chemical TriVecta Black 100 goes the distance.
