MARQUEE ENVY MP-08

*RoHS-Compliant Mid-Phosphorous
Process for Electroless Nickel*

Extended Product Line:

MARQUEE ENVY MP-08SR

Self-regulating process for RoHs compliant,
mid-phosphorus electroless nickel plating.
Does not contain any lead or cadmium
to meet ELV requirements.

Contains No Lead or Cadmium to meet ELV requirements

Fast and Long-Lasting

Fast deposition rate throughout the life of the bath helps deliver more efficient and cost-effective plating results.

Meets Specifications

MARQUEE ENVY MP-08 meets ASTM-B-733 and AMS 2404 C specifications.

Easy-to-Use

This is a simple two component add back system with an easy-to-use 1:1 replenishment rate.

Extremely Deep, Brilliant and Decorative Finish

Provides a deep, brilliant, decorative finish for your plated parts.

Uniform Plating Thickness and Hardness

Produces uniform plating thickness and hardness.

Excellent Stability

Long solution life with 8-12+ turnovers.
