

COLDIP® MIDNIGHT 1500

Black Trivalent Passivate for Zinc

Additional Columbia Chemical sealers for enhanced handling and corrosion protection

TRIVECTA® SEALER 350

Trivalent chromium based sealer that is high-heat tolerant and provides additional gloss and corrosion protection.

TRIVECTA® SEALER 351

Organic based sealer provides extended corrosion resistance drying to a hard finish without drip marks or other blemishes.

TRIVECTA® BLACK 100

Organic sealer provides extended salt spray resistance, improves the gloss and scratch resistance and can be applied over clear, blue, and iridescent passivates.

ELV, ROHS & REACH Compliant

Outstanding Black Trivalent Coating

Provides a consistent and deep black appearance.

Superior Corrosion Protection

Produces a finish that exceed 168 hours of neutral salt spray to white corrosion without a sealers. Exceeds 240 hours to first white corrosion when when top coated with Columbia Chemical sealers and topcoats.

Versatile

Works well over acid chloride zinc (both ammoniated and on-ammoniated systems), cyanide zinc, alkaline cyanide-free zinc, and zinc-iron/cobalt alloy deposits.

Easy to Control

Contains three additives which allow for maximum color control.
