

COLDIP® TRI-V 400 CL

*The Only True Clear Trivalent Conversion Coating
for Electroplated Zinc*

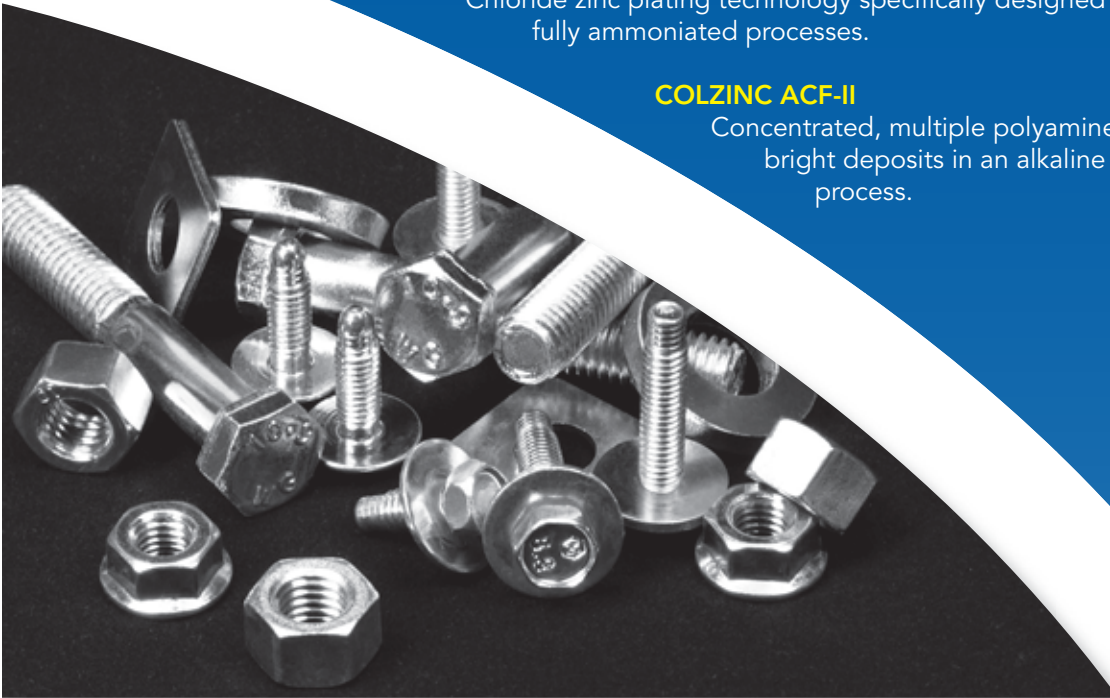

Extended product line

COLSID K-250, COLSID AP, COLSID AP-HT

Chloride zinc plating technology specifically designed for straight, mixed or fully ammoniated processes.

COLZINC ACF-II

Concentrated, multiple polyamine blend that produces brilliantly bright deposits in an alkaline cyanide-free zinc plating process.

Clear finish

The only truly clear passivate that provides beneficial salt spray protection without a sealer. Meets ASTM-B-633 specifications.

Economical

Economical alternative to a leach and seal process.

One-part system

A simple process that is applied by conventional immersion techniques and does not require multiple starter, adjuster or replenisher additives.

Environmentally friendly

Is chelator-free and does not rely on chelate ligand technology.
