

# COLFIN TTM-1016

## Torque Tension Modifier with UV Tracer

Approved Columbia Chemical passivates for enhanced performance

### COLDIP® TRI-V 121

Trivalent blue-bright zinc passivate.

### COLDIP® TRI-V 200 UB

Trivalent ultra blue-bright zinc passivate.

### SpectraMATE® 21, SpectraMATE® 25

Trivalent thick-film iridescent zinc passivates.

### SpectraMATE® 151 CFT

Trivalent thick-film iridescent cobalt-free zinc passivate.

### TRIVECTA® NI-Z Black 70

Trivalent black passivate for zinc nickel.

### COLDIP® TRI-V ZnNi True Blue 1000

Trivalent deep blue passivate for zinc nickel.

### Torque Tension Modifier

A torque tension modifier/lubricant that can be used over all electroplated or mechanically plated and passivated zinc and zinc-alloy deposits. Meets the coefficient of friction range of 0.10 - 0.16 over zinc.

### Added Corrosion Protection

Increases the corrosion protection of zinc and zinc alloy finishes.

### UV Tracer

Formulated with a built-in UV tracer to allow application confirmation.

### One Part System

An easy-to-use water based liquid.

### Meets Specifications

Meets the requirements of General Motors GMW3044 G, PSA B15 4140, Renault 0171002, TRW TS 2-21-07, and is approved by John Deere for JDM F21, Symbol A and F for Zinc-Nickel electrodeposits.
