COMPANY OVERVIEW

A global leader in surface finishing for more than 40 years, Columbia Chemical specializes in providing superior plating chemistry to both functional and decorative platers. Heavily focused in the automotive industry, we supply our specialty plating chemistry to customers throughout the U.S., Canada and Mexico as well as more than 30 countries through a combination of direct sales, distribution partners and joint venture companies.

Functional and decorative platers trust Columbia Chemical for all of their product needs, from cleaners and acid inhibitors to brighteners, passivates, topcoats and waste treatment. Our plating chemistry is known for innovation, quality and dependability among electroplaters and surface finishers who want top results from their zinc, zinc alloy, tin, electroless nickel, decorative nickel and trivalent chromium plating chemistries. We have a solid reputation for providing the technical support and expertise to solve plating challenges, enhance plant efficiency and control costs. Our ultimate goal is to partner with our customers to make their job easier.

Our Brunswick, Ohio headquarters is home to our innovative research and development, high quality manufacturing, warehousing, industry leading service and technical support, and full-service administrative offices. We are committed to delivering products and services that meet and exceed customer and regulatory standards by operating within the framework of our documented ISO quality management system.

We are proud to be a 100% employee-owned (ESOP) company and that pride resonates in the way our employees work with our customers, suppliers and community. As an ESOP company, every Columbia Chemical employee has an investment in our success and is motivated to constantly improve on the products and services that we provide.

Finisher's Advantage

*Our People • Our Chemistries
• Our Customer Focus*

Surface finishing companies, electroplaters and specialty chemical distributors have many choices when it comes to choosing a plating chemistry supplier. So why do customers choose Columbia Chemical?

It's the **Finisher's Advantage** - our approach to working with our customers as a partner rather than just as their supplier. We strive to provide added value in every aspect of our customers' experiences with us, going well beyond the products we provide.

We partner each customer with a designated account specialist, a technical manager and a customer service rep for personalized and consistent service. We combine that with superior products, competitive pricing, innovative R&D and expert surface finishing knowledge and a commitment to help our customers reach and maintain their quality and throughput goals.
