Innovation in Decorative Trivalent Plating

TriCOL[®] Reclaim

White Trivalent Chromium Plating Process

Extended Product Line

NiCOL SB Advantage and NiCOL SB Simplicity

Dual- or single-additive processes for semi bright nickel plating. Ideal for plating on plastic.

NiCOL LevelBright and NiCOL LevelBright Single

Non-index, dual- or single-additive systems for bright nickel plating. Superb coverage for plating complex geometries.

Extended Product Line

Single Index-based, dual- or single-additive systems for bright nickel plating.

- **Simplified Replenishment – Single liquid additive**

Exclusive additive featuring pre-complexed chromium liquid which requires no heat to complex along with the convenience to utilize an auto-feeder.

Reclaim time on the line!

- **Exceptional cost savings – comparable to hex chrome**

Average savings of 40-60% over existing trivalent chromium processes.

Reclaim your profits!

- **Brightest Trivalent White**

Revolutionary new process results in the brightest white appearance and high L*a*b* color values.

Reclaim superior brightness!

- **Unique formulation – prevents buildup of counterions**

Gravity does not increase over time - allows for reclamation.

Reclaim savings & quality!

- **Free from chrome dust mess**

No messy powder or chrome dust exposure for operators.

Reclaim worker safety!
